CORDIA: SUCCESS BUILT OF ALUMINIUM

Dlaczego spośród dziesiątek firm w branży warto współpracować właśnie z Cordią?

Wybór dostawcy to bardzo ważna decyzja. Kontrahenci i podwykonawcy wpływają na jakość, terminy a często na całą przyszłość firmy. Kto chce się rozwijać, musi otaczać się ludźmi, na których może polegać. Od doboru właściwych partnerów w biznesie zależy bardzo wiele.

Na Cordię możesz liczyć w każdej sytuacji:

Pracujemy profesjonalnie

Pod marką Cordia działamy od 2000 roku, ale jako zespół rozwijamy się od pokoleń. Łączymy trwałość i doświadczenie firmy rodzinnej oraz energię stale rozwijającego się przedsiębiorstwa z branży nowych technologii. Po dziesiątkach lat rozwoju dobrze wiemy, czego potrzebują klienci, a dzięki doskonałej znajomości światowego rynku potrafimy również wyprzedzać ich potrzeby. Dlatego chętnie zostają z nami na lata; jesteśmy partnerem, z którym można rozwijać się łatwiej i szybciej.

Why is Cordia, one of dozens of companies in this sector, worth cooperating with?

Choosing a supplier is a very important decision. Contractors and subcontractors very often impact the quality, the deadlines and even the company's future. To develop, you need to rub shoulders with the ones you can lean on. A lot depends on the choice of competent business partners.

You can rely on us.

We work professionally

We have been working as Cordia since 2000, but we've been developing for generations as a team. We combine the consistency and the experience of a family business with energy of a continuously growing company from the new technologies industry.

After decades of development we know what the customers need, and thanks to in-depth knowledge of the global market, we also know how to stay ahead of their requirements. That is why they stay with us for years; we are the partner with whom they can develop easier and faster.

Pracujemy ciężko

Wierzymy, że nasi klienci zasługują na wszystko, co najlepsze.

Żaden dobry produkt nie robi się sam, a profesjonalizmu nie da się niczym zastąpić. Stale unowocześniamy park maszynowy, ale kluczem do prawdziwego mistrzostwa zawsze będą ludzie. To oni dostarczają to, co jest tak ważne dla naszych klientów: głębokie zrozumienie ich potrzeb i znalezienie rozwiązań idealnie dopasowanych do tych potrzeb.

Nasze produkty świadczą o nas.

Angażujemy się na 100% od ponad dwudziestu lat, by to świadectwo pokazywało nas w jak najlepszym świetle.

We work hard

We believe that our customers deserve the best

No good product is produced on its own and professionalism cannot be replaced. We continuously upgrade the machine park, but the people will always be the key to true championship. They deliver everything that is so significant for our customers: a deep understanding of their needs and finding solutions that perfectly fit their demands..

Our products make us who we are.

We have been devoting 100% of ourselves for 20 years now in order to make this legacy show us in the most favourable light.

POZNAJ MARZENKĘ

Oto Marzenka – pierwsza maszyna Cordii.

Od tej ręcznej frezarko-kopiarki zaczęła się nasza historia. Dziś odpoczywa w firmowej galerii, patrząc na nowe pokolenie cyfrowo sterowanych robotów, które ją zastąpiły w dostarczaniu klientom coraz lepszych produktów.

Dziękujemy, Marzenko!

MEET MARZENKA

This is Marzenka – the first Cordia's machine.

We began our story with this tracer milling machine. Currently, she rests in our gallery, observing new generations of digitally controlled robots that took her place in delivering even better products to our customers.

Thank you, Marzenka!

Pracujemy z pasją

5 lat działania na rynku budzi szacunek.
Po 10 latach można mówić o wielkim sukcesie.
My zaś mamy zadowolonych klientów już 20 lat.

Takie rezultaty nie biorą się z jednej szczęśliwej decyzji czy udanej koniunktury. Biorą się z pasji.

Pracujemy z przyjemnością: ciągle szukamy nowych rozwiązań, testujemy ciekawe technologie i robimy wszystko, by nasi klienci byli z nas zadowoleni.

Jesteśmy inżynierami i przedsiębiorcami z powołania. Nie chcielibyśmy i nie planujemy robić nic innego. Z dumą patrzymy, jak nasi klienci rosną i realizują coraz ambitniejsze plany. Z małej, lokalnej firmy staliśmy się zaufanym partnerem dla małych, średnich i dużych biznesów w całej Europie.

Tworzymy firmę, z jaką sami chcielibyśmy pracować, i produkty, z których sami chcielibyśmy korzystać. To przepis na sukces, który można zrealizować tylko z takim zespołem jak Cordia – ludźmi pracującymi profesjonalnie, ciężko i z pasją.

Jak zacząć?

Jak sprawić, byśmy obietnice mogli zmienić w rezultaty?
Po prostu zadzwoń na [+48 795 149 714](tel:+48795149714)
albo umów spotkanie biuro@cordia.pl.
Každy sukces zaczyna się od pierwszego kontaktu.

Zapraszamy!

UMÓW SPOTKANIE:

Niezobowiązujące, ale dające wielkie możliwości.
W biznesie najlepsza jest rozmowa. Pokażemy Ci produkcję, opiszemy ofertę i terminy, odpowiemy na wszystkie pytania. Napisz, kiedy miałbyś dla nas chwilę, a odpowiemy jak najszybciej i dopasujemy się do Twego planu.

We work with passion

5 years on the market command respect.
After 10 years, we are allowed to talk about a huge success.
Meanwhile, we have been satisfying customers for 20 years now.

These kinds of results do not follow from one lucky decision or successful economic situation. They result from passion.

We work with pleasure: we are continually looking for new solutions, we are studying new technologies and we do everything it takes to make our customers satisfied.

We are engineers and entrepreneurs by vocation. We do not want to and do not plan to do anything else.

We are proud to see our customers' improvement and how they realize an even more ambitious agenda. From a small, local company we rose to be a trusted partner for small, medium-sized and large companies in Europe.

We build a company with which we would like to cooperate and products which we would like to use.

This is the recipe for success which can be achieved only with a team like Cordia – people who work professionally, hard and with passion.

How to begin?

How to transform our promises into results?
Just call us at +48 795 149 714 or arrange a meeting.
Every success starts with a first step.

You are more than welcome!

ARRANGE THE MEETING:

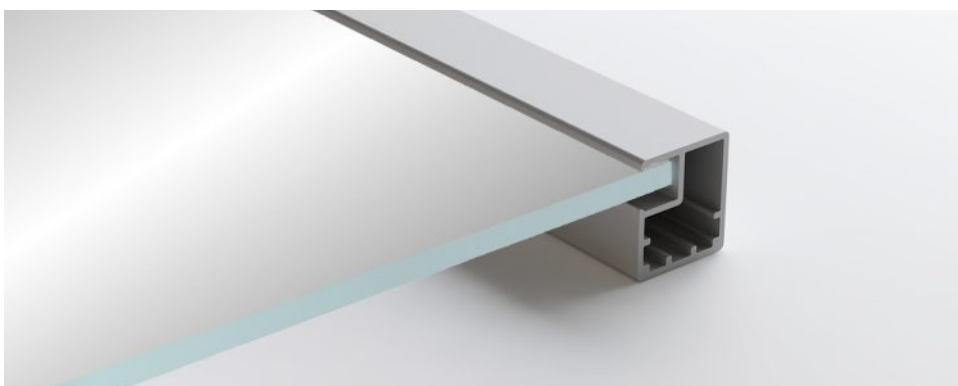

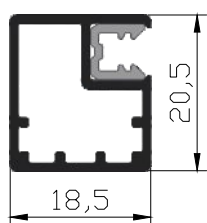

It is noncommittal, but offers great opportunities.

The conversation is the best in the business. We will show you the production, outline the offer and deadlines and answer all of your questions..

MOŻLIWOŚCI PRODUKCYJNE

Oferujemy usługę anodowania detali aluminiowych (zarówno z materiału własnego, jak i z detali powierzonych) o maksymalnej długości do 2,2 metra.

Specjalizujemy się głównie w anodowaniu małych i średnich elementów już po wykonanej obróbce, gdzie priorytetową rzeczą dla zleceniodawcy jest oprócz bardzo dobrej jakości brak widocznych śladów po zawieszce. (tzw. anodowanie „bezsładowe”).

Grubość powłoki tlenkowej jaką wykonujemy, to przedział pomiędzy 5 - 25 mikronów w zależności od wymagań zleceniodawcy.

OBRÓBKĄ POWIERZCHNIOWĄ PROFILI

Profile aluminiowe przed usługą anodowania mogą być poddane procesowi obróbki mechanicznej powierzchni w postaci śrutowania, tym samym oferując klientom możliwość zastosowania nowego typu wysoko dekoracyjnej powierzchni profili.

aluminium jako surowiec poddaje się w 100% recyklingowi

We offer the service of anodising aluminium details (both from our own material and from provided details) with a maximum length of up to 2.2 meters.

PRODUCTION POSSIBILITIES

We specialize mainly in anodizing small and medium elements after processing, where the priority for the customer is, in addition to very good quality, the lack of visible traces of the hanger. (the so-called „traceless” anodizing).

The thickness of the oxide coating that we make is between 5 and 25 microns, depending on the customer's requirements.

SURFACE TREATMENT OF PROFILES

Before the anodizing service, aluminum profiles can be subjected to a mechanical surface treatment process in the form of shot blasting, thus offering customers the possibility of using a new type of highly decorative profile surface.

aluminum as a raw material is 100% recyclable
